Subject: Permission request

I have written a manuscript that I hope to submit to Indoor Air, sometime in July 2000. However, I also decided to submit my abstract to Air & Waste Management, recently, in hopes of presenting a poster at their upcoming symposium titled Engineering Solutions to Indoor Air Quality Problems. My abstract was well received and they decided to list me as one of their platform presenters. This presentation requires me to submit a manuscript for their symposium proceedings. In your instructions to authors you state "the work shall not be published elsewhere in any language without the written consent of the **publisher**".

I would like to receive permission to use my manuscript for both Indoor Air and this engineering symposium held in July 2000. The symposium proceedings requires a submission of no more than 16 pages. My current manuscript (double spaced) is approximately 18 pages plus 10 figures, but I am still editing it at this time. Therefore, I plan on condensing my manuscript to fit the symposium proceedings requirements plus submit my full manuscript to Indoor Air. May I receive permission to do this?

The title of my manuscript is "Comparison of Three Air Distribution Systems by CFD Modeling". Please feel free to call me, Dan Hirnikel, in the USA at (804)-274-4131 or email a reply. I hope that this special request can be approved.

I look forward to hearing from you...Dan Hirnikel
